SECTION 3.0 SCOPE OF WORK

3.1 SCOPE OF SERVICES

Awarded Bidder (hereinafter referred to as the "CONTRACTOR") shall furnish all labor, materials, and equipment necessary to install Treated Piles and Waterway Markers as described herein and in accordance with the Site Development Map, attached hereto as Exhibit 1.

CONTRACTOR shall provide and install the following:

- 1) Install (3) Treated Piles with (3) Waterway Markers in the first area shown on the Site Development Map.
- 2) Install (2) Waterway Markers in the first area shown on the Site Development Map.
- 3) Install (7) Treated Piles with (7) Waterway Markers in the area in the second area shown on the Site Development Map.
- 4) Install (3) Waterway Markers in the second area shown on the Site Development Map.

3.2 STANDARD TECHNICAL SPECIFICATIONS AND OTHER REQUIREMENTS

A. LOCATIONS

- 1) First area is Keystone Point channel between Broad Causeway and 135th street, east of Intracoastal Waterway.
- 2) Second area is off SanSauci Gated between Broad Causeway and Biscayne Canal, east of Intracoastal Waterway.

B. PILES

- 1) Types
 - a. Treated Wood Timber Piles: Standard treated wood timber piles shall be at least 10" in diameter unless otherwise indicated. For salt or brackish water applications, the timber piles shall be pressure treated with Chromated Copper Arsenate (2.50), and for freshwater applications, the timber piles shall be pressure treated with Chromated Copper Arsenate (0.80), Alkaline Copper Quaternary (0.80), or Ammoniacal Copper Zinc Arsenate (1.0).

Piles shall be carefully handled with no sudden dropping, breaking of outer fibers, bruising, or penetration of the surface with tools. Bolt holes shall be bored 1/8" larger than the diameter of the bolt. Any piles which require excessive bending in order to frame properly shall be withdrawn and reinstalled to the proper batter. Piles shall not be installed and then pulled into position. Minor adjustment (less than three-degrees to vertical) is allowed after pile installation; however, the CONTRACTOR is fully responsible to ensure soil has settled around the pile so that no listing will occur. Piles damaged, not located in the proper location, or driven out of alignment shall be withdrawn and replaced by new piles or shall be cut off at the mud-line and additional piles installed as directed, all without additional cost to the CITY. When installing more than one pile per marker

installation, the pile tops shall be cut to equal height (± 1 ""). The maximum permissible deviation for piles out of plumb or off batter shall be two-percent of the pile length, and the pile spacing will vary no more than 6" from the spacing specified in the marker details.

- b. Pile Wrap: Application of high density polyethylene wrap to wooden piles. Wrap shall be a minimum of .030" in thickness. The wrap shall be purchased and installed by the CONTRACTOR according to the manufacturer's recommendations for the specific water depth pile is located covering the pile surface area to include both the mean low and high water lines. Prior to applying wrap to pile, the pile which is soiled with fecal matter, marine residue, mold, mud, or other matter will be thoroughly cleaned. The wrap shall be installed using 1-1/4" stainless steel ring-shank roofing nails every 2" along the seam.

2) Installation Standards

- a. Pile Marking: Prior to moving the piles from the upland staging area to the waterway, the piles shall be marked as follows: Mark lines, not to exceed 6- inches long by 1-inch wide along the circumference of the pile. The lines shall be neatly marked every five feet, starting from the embedment tip. Neatly label each line 0', 5', 10' etc. with 4-inch high numerals. Lines and labels shall be marked utilizing using indelible ink or waterproof paint. Prior to transporting marked piles onto the waterway, notify City for their inspection.
- b. Pile Driving Equipment: Pile-driving equipment shall be of a size and type to deliver consistently effective dynamic energy suitable for the type and capacity of the piles to be driving and the material into which they are to be driven. If using composite piles, installation shall be in accordance with manufacturer's specifications.
- c. Pile Driving: Punching or drilling holes will be allowed when necessary to permit piles to pass through those strata and reach required penetration. Blasting of holes for the piles is not permitted. The CONTRACTOR shall drive all piles continuously and without voluntary interruption. After driving and back-driving, the CONTRACTOR shall cut piles at the cutoff grade line, and the surplus material shall be removed from the work site. Any piles requiring excessive bending in order to frame properly shall be withdrawn and re-driven to the proper batter. Driving batter piles vertically and then pulling them into position is not permitted. Piles shall not be installed by excavating then backfilling and compacting. Minor adjustment (less than 3° to vertical) is allowed after pile installation; however, the CONTRACTOR is fully responsible to ensure soil has settled around the pile so that no listing will occur. Piles damaged, not located in the proper location, or driven out of alignment shall be withdrawn and replaced by new piles or shall be cut off at the mud-line and additional piles installed as directed, all without additional cost to the City.

As indicated in the details, piles shall penetrate at least eight (8) feet of sand and/or shell, or at least 10 feet or more of mud, as appropriate, to

support the marker. If rock is encountered, pre-drilling of the pile hole and/or a pile shoe may be required. If an auguring or punching method is deemed necessary to install a pile into rock or hard substrate, the method must first be approved by the City. If these methods require grouting, the materials and methodology must also be approved by the City. Piles shall not be connected or joined together to lengthen.

Unless otherwise indicated, all installations include sign panel(s), cross members, pile cap(s) and reflective white tape. Sign or pile assemblies not completed at the end of each work day must be marked and made visible to day and nighttime waterway traffic with at least one reflective tape band. However, no more than two (2) pile assemblies (single or double) may be left unfinished at the end of each work day.

CONTRACTOR shall verify water depths and bottom types at all work locations and note in the Marker Records. Depth information (if provided) is approximate and does not reflect tidal fluctuations.

- d. Unforeseen Physical Conditions: CONTRACTOR shall promptly notify the City's Project Manager (CPM) in writing of any subsurface or latent physical conditions at the site that would potentially affect the project. In the event that rock is encountered, the CONTRACTOR shall provide suitable evidence in the form of test pile information, Standard Penetration Test or similar standard tests. If the CPM finds that the results of such surveys or tests indicate that there are subsurface or latent physical conditions which would affect the project, and which could not reasonably have been anticipated by the CONTRACTOR, a Change Order may be issued incorporating the necessary revisions.

C. WATERWAY CHANNEL MARKERS

The bottom of all Waterway Channel Markers (sign panels) must be a minimum of six (6) feet above the mean high water level and shall not exceed nine (9) feet above the mean high water level. CONTRACTOR shall not degrade the message area or reflective surfaces of the sign panels when drilling holes or split the ends of the cross members on the backs of panels. CONTRACTOR shall replace, at its own expense, any sign panels that it damages during the delivery and installation process. Sign panels shall be installed back-to-back on opposite sides of a pile.

1) Types

- a. Starboard Daymark Waterway Marker Signs – Red Isosceles Triangle - 4' x 4' x 4'. Alodine treated day glow fluorescent red background, (12") red high intensity numbers and (2") borders.

- b. Port Daymark Waterway Marker Signs – Green Square – 3’ x 3’. Aluminum green fluorescent background and high intensity reflective green numbers (12”) and borders (2”).

2) Installation Standards

- a. Waterway channel marker materials and installation shall meet or exceed the U.S. Coast Guard standards for uniformity and consistency (Title 33, Code of Federal Regulations).
- b. Waterway Channel Markers: All installations of 3’ x 4’ sign panels shall be mounted on both sides of post and 6” below Day Beacon.
- c. All installations of 3’ x 4’ channel marker signs shall be mounted on one 10” diameter (or larger) standard treated timber piling. Signs shall be drilled and fastened by penetration of the post by two (2) type 304 stainless steel $\frac{3}{4}$ ” through bolts, which must not extend more than 1” or less than $\frac{1}{2}$ ” beyond type 304 stainless steel hex-nut, stainless steel lock washer, and stainless steel flat washer. A nylon flat washer will be placed between stainless steel fasteners and aluminum signs to prevent bi-metallic corrosion. All fasteners shall be vandal proofed.

3.3 PRE-CONSTRUCTION/SCHEDULING MEETING

Prior to the commencement of Work, the CONTRACTOR shall attend a preconstruction conference with the CITY to discuss the schedule, procedures for handling shop drawings and other submittals, and to establish a working understanding among the parties as to the Work. During the prosecution of the Work, the CONTRACTOR shall attend any and all meetings convened by the CITY with respect to the Project, when directed to do so by CITY. CONTRACTOR shall have its subcontractors and suppliers attend all such meetings (including the preconstruction conference) as may be directed by the CITY.

3.4 MARKER LOCATIONS

For the installation of new waterway markers, CONTRACTOR shall locate positions using a Wide Area Augmentation System (WAAS) enabled digital global positioning system (DGPS) referenced to World Geodetic System 1984 (WGS84) map datum. The actual position of installed markers shall be within two (2) meters (6 feet) of the location designated by the CITY on the maps and/or marker plan. Any discrepancies between the coordinates of the marker location provided on the marker plan and/or the maps shall be reported to the CITY prior to installation. Extra caution should be exercised in the event markers are required to be installed close to or within the Intracoastal Waterway (ICW) right-of-way. CONTRACTOR shall notify the CPM of any potential obstructions to navigation.

3.5 MOBILIZATION AND DEMOBILIZATION

CONTRACTOR shall occupy the work site(s) with all equipment, personnel and supplies and prepare appropriate staging area(s) for material stockpiling and access to the work site(s). CONTRACTOR shall complete all assigned work under the Contract and remove all of its equipment, supplies, and other materials involved in this project from the work site(s) once project is complete.

3.6 MARKER RECORDS

CONTRACTOR shall collect additional information relative to the marker installation and/or removal, inspection, at the time the work is done. The additional marker information collected includes, at a minimum, the following: date, type of anchor and down line system, method of pile installation, depth of pile penetration, water depth, current tide, substrate, problems encountered, modifications in the work plan and any other details relative to the marker work performed. CONTRACTOR shall submit to the CITY this additional information collected for each marker within thirty (30) business days of the project completion. CONTRACTOR shall provide all required manufacturer's specifications and warranty information with the submittal of the marker records.

CONTRACTOR shall provide the CITY with coordinates in degree and decimal minutes (example: N30° 07.980', W81° 27.675') for all markers installed. CONTRACTOR may be required to provide digital photographs of each marker and marker installation. The photographs must be clear, legible, and identified with the marker reference number.

3.7 PRODUCT WARRANTIES

CONTRACTOR's warranty information shall be provided upon submission of the Marker Records. All materials utilized by the CONTRACTOR to complete project shall be covered by the CONTRACTOR's standard manufacturer's warranty and standard commercial parts warranty.

INSTALLATION OF TREATED PILES AND WATERWAY CHANNEL MARKERS IFB No. 50-18-19

DIVISION 8. CONE OF SILENCE

Sec. 7-192. Cone of Silence.

(a) Purpose and intent. The requirements of section 2-11.1, Cone of Silence Ordinances of the Code of Miami-Dade County, Florida, as amended, shall be applicable to the City. It is the intent of this code to prevent potential bidders, offerors or service providers from communicating with City department heads, their staff or selection and evaluation committee members during the period of time in which the cone of silence is imposed.

(b) Cone of silence is defined to mean a PROHIBITION on:

(1) Any communication regarding a particular RFP, RFQ or IFB between a potential offeror, service provider, bidder, lobbyist, or consultant and the City's professional staff including, but not limited to, the City manager and his or her staff;

(2) Any communication regarding a particular RFP, RFQ or IFB between the mayor, City council or their respective staffs and any member of the City's professional staff including, but not limited to, the City manager and his or her staff;

(3) Any communication regarding a particular RFP, RFQ or IFB between a potential offeror, service provider, bidder, lobbyist, or consultant and any member of the selection committee or evaluation committee;

(4) Any communication regarding a particular RFP, RFQ or IFB between the mayor, City council or their respective staffs and any member of the selection committee or evaluation committee; and

(5) Any communication regarding a particular RFP, RFQ or IFB between a potential offeror, service provider, bidder, lobbyist, or consultant and the mayor, City Council and their respective staffs.

(c) The City manager and the chairperson of the selection committee may communicate about a particular selection committee recommendation, but only after the committee has submitted an award recommendation to the City manager and provided that should any change occur in the committee recommendation, the content of the communication and of the corresponding change shall be described in writing and filed by the City manager.

(d) Notwithstanding the foregoing, the cone of silence shall not apply to:

(1) Competitive processes for the award of CDBG, HOME, and SHIP funds and community-based organization (CBO) competitive grant processes, administered by the City;

(2) Communications with the City attorney and his or her staff;

(3) Duly noticed site visits to determine the competency of bidders regarding a particular bid during the time period between the opening of bids and the time the City manager makes a written recommendation;

(4) Emergency procurements of goods or services pursuant to section 7-144;

(5) Communications regarding a particular RFP, RFQ or IFB between any person and the director of the purchasing department or designee, provided the communication is limited strictly to matters of process or procedure already contained in the corresponding solicitation document; and

(6) Communications regarding a particular proposal, quotation or bid between the director of the purchasing department or designee and a member of the selection committee or evaluation committee provided the communication is limited strictly to matters of process or procedure already contained in the corresponding solicitation document.

Sec. 7-193. Procedure.

(a) A cone of silence shall be imposed upon each RFP, RFQ and IFB after the advertisement of said RFP, RFQ or IFB. At the time of imposition of the cone of silence, the director of the purchasing department or designee shall provide for public notice of the cone of silence. The director of the purchasing department shall issue a written notice thereof to the affected departments, file a copy of such notice with the City clerk, with a copy thereof to each City council member, and shall include in any public solicitation for supplies or services a statement disclosing the requirements of this ordinance. Notwithstanding any other provision of this section, the imposition of a cone of silence on a particular RFP, RFQ or IFB shall not preclude procurement staff from obtaining industry comment or performing market research provided all communications related thereto with a potential offeror, service provider, bidder, lobbyist, or consultant are in writing or are made at a duly noticed public meeting.

(b) The cone of silence shall terminate at the time the City manager makes his or her written recommendation of award; provided, however, that if the City manager refers the recommendation back to the director of the purchasing department for further review, the cone of silence shall be re-imposed until such time as the City manager makes a subsequent written recommendation of award. If the City manager rejects all bids or proposals submitted in response to an RFP or IFB and concurrently requests the re-issuance of an RFP or IFB, the rejected bids or proposals shall remain under the cone of silence until such time the City manager issues a written recommendation of award or until the City manager withdraws the re-issued RFP or IFB.

(c) Exceptions. The provisions of this code shall not apply to oral communications at pre-bid conferences, oral presentations before selection committees or evaluation committees, contract negotiations during any duly noticed public meeting, public presentations made to the City council during any duly noticed public meeting or communications in writing at any time with any City employee, official or member of the City council unless specifically prohibited by the applicable RFP, RFQ or IFB documents. The offeror or bidder shall file a copy of any written communication with the City clerk. The cone of silence shall not apply to small purchases or emergency purchases, pursuant to this code.
