SITE DESCRIPTION

PRODUCT NAME: CITY OF NORTH MANIAC TRAFFIC CIRCLE INTERSECTION
PRODUCT LOCATION: City of North Manic, Florida
PROJECT LOCATION: City of North Miami
OWNER LOCATION: 771 N.W. 125th Street
OWNER ADDRESS: North Miami, FL 33161
POINT DESCRIPTION AND SHEET DISTRIBUTING: This project consists of four main rehabilitation and associated pavement and striping restoration. New roadway pavement includes asphalt base and asphaltic concrete as well as areas of milling existing asphaltic concrete and repaving.

SEQUENCE OF MAJOR ACTIVITIES:
1. Initial structural erosion control measures. Contractor required to protect all existing delays in project area.
2. Initial paving over areas shown on plans.
3. Initial striping throughout project.

TEMPORARY STABILIZATION:
- Delineated portions of site will be stabilized with temporary sand and rock chips for at least 21 days shall be stabilized with temporary sand and rock chips for at least 14 days from the last construction activity in that area.

PERMANENT STABILIZATION:
- Delineated portions of the site where construction activity permanently ceases shall be stabilized with sand or soil that are not affected by erosion, which is solid and/or cutback protection shall be installed in the drainage structures.

STORMWATER MANAGEMENT:
- Delineated portions of the site include stormwater management facilities. All catch basins and storm drain outlets will be protected with permanent protection baffles, and will discharge overflow into retention areas located within the project boundaries.

WASTE DISPOSAL:
- Muds, Materials: Any waste materials will be handled and disposed of according to local ordinances. The contractor will be required to unload and enter any such ordinances.
- All sanitary waste will be collected from the permanent units using a licensed sanitary waste management contractor as required by local regulations.
- Garbage Disposal: All garbage will be sent to the city waste plant.
- OFF-SITE VEHICLE TRAFFIC:
- Dump trucks bringing material from the construction site will be covered with tarpaulin. Prior to leaving the site, the surface will be removed from trucks in the cleaning area indicated on the plans.

TIMING OF CONSTRUCTION:
- Delineated portions of the site include only those areas where the possibility of runoff from a construction site would, under the rainfall intensity, generate by the limits of beneficial activities.

PREVENTION:
- Delineated portions of the site include only those areas where enforcement of the construction site with the use of a Lee's silt fence will be required. Existing drainage plans and positive drainage to existing outlets shall be maintained throughout construction.

SCHEDULE OF COMPLIANCE WITH:
- Federal, State, and Local Regulations:

THE KEVIN HORR/STRAINER/REDESIGN AND SEGMENT CONTROL, INSPECTION AND COMPLIANCE:

The silt fence feature included as part of the contract shall be provided by the contractor during the construction period. The four major control practices are outlined below, and if necessary, the following shall be provided as the work progresses:

- All measures will be maintained in good working order; if necessary, it will be prepared within 24 hours if the report.

NON-STORMWATER DISCHARGES:
- It is expected that the following non-stormwater discharges will occur from the site during the construction period:

INVENTORY OF POLLUTION PREVENTION PLAN:
- The materials or substances listed below are expected to be present on-site during construction:

MATERIAL MANAGEMENT PRACTICES:
- The following are the material management practices that are expected to be present on-site during the construction project:

Hazardous Products:
- These products are expected to be used on the site and associated with hazardous materials. Products will be kept in original containers unless they are not necessary.

Pesticides:
- The use of pesticides on the site may not be required, subject to their certain important product.

PETROLEUM PRODUCTS:
- All on-site vehicles will be monitored for leaks or unusual leak presence.

POLLUTANTS:
- Facility located in the area and should be removed by the site owner as required by the manufacturer.

PAINTS AND PAINTING MARRIAGE MATERIALS:
- All equipment will be cleaned and empty when not required for use. Concrete plant will not be required for the concrete plant system and will be properly disposed of according to the manufacturer's instructions or state and local regulations.

CONCRETE TRUCKS:
- Concrete trucks will not be allowed to empty or discharge concrete into or drain water to the site.
