

LimeBike is revolutionizing the way we conquer the first and last mile.

Our solar-powered 3G-GPS dockless smart bike allows the public to locate and unlock any LimeBike using our mobile app. Riders can cycle to their destination and pull the red lever to lock their bike at any commonly accepted parking spot. We empower the community by making transportation accessible, affordable, and healthier.

LimeBike Benefits to the Community

Cost

LimeBike requires no funding from your government, thus allowing taxpayer dollars to empower other important efforts in your community. At \$1.00 per ride or \$30.00 for 100 rides, LimeBike is accessible and affordable to all.

Reduces Traffic & Pollution

Biking decreases the number of vehicles on the road and takes up less space to park. Commuting short distances saves up to 2,000lbs of CO2 per year per person.

Supporting the Local Economy

Bikers have easier access to local shops and services. We partner with businesses to bring LimeBike users to their stores, making the community more vibrant.
